Universalfräser, für alle Werkstoffgruppen einsetzbar  
Universal End Mill, for all Material Groups

## Mehr als 100 Jahre Präzision und Innovation. More than 100 years of precision and innovation.

FRANKEN als Teil der EMUGE-FRANKEN Unternehmensgruppe beschäftigt sich seit seiner Gründung mit der Entwicklung und Produktion von Fräswerkzeugen. Präzision und Innovation prägen das breite Angebot von Fräsern aus Hartmetall und HSS sowie PKD-, CBN- oder wendeplattenbestückten Fräskörpern.

Die Fertigung am deutschen Produktionsstandort in Rückersdorf reicht von Standard-Schaft- und Bohrungsfräsern bis hin zu hochgenauen Form- und Profil-Sonderfräsern. Mit seiner Typen- und Schneidstoffvielfalt, dem hohen Standard und der kompromisslosen Präzision entspricht das Fräserprogramm den höchsten Qualitätsanforderungen.

Als Ergänzung zu den Fräswerkzeugen führen wir ein durchgängiges Programm an Fräserspannmitteln und Zubehör für die verschiedensten Adaptierungsmöglichkeiten.

Ever since its foundation FRANKEN as part of the EMUGE-FRANKEN company association has been developing and manufacturing milling tools. The wide range of end mills of solid carbide and HSS as well as PCD and CBN inserts or milling cutters with indexable inserts is characterised by precision and innovation.

The production in our German manufacturing plant in Rückersdorf includes standard end mills and bore cutters as well as highly precise special form and profile milling tools. With its large variety of tool types and cutting materials, the consistently high standards and uncompromising precision, our product range of milling cutters meets even the highest quality requirements.

In addition to our selection of milling tools, we also offer a comprehensive range of clamping systems, tool holders and accessories.

Produktionsstandort in Deutschland  
Production location in Germany

TOP-Cut-Fräser sind Universalfräser aus Hartmetall, die durch ihre speziellen Geometrieeigenschaften in nahezu allen Materialien und Fräswerfahren eingesetzt werden können.

#### Besonderheiten:

- Ungleicher Drallwinkel
- Konisch ansteigender Spannutengrund
- Hochleistungs-Beschichtung
- Optional mit innerer Kühlsmierstoff-Zufuhr mit axialem Austritt (ICA)

#### Hauptmerkmal:

Für alle Werkstoffgruppen einsetzbar.

Durch die Vielzahl an verschiedenen Ausführungen und Abmessungen wird ein sehr breites Anwendungsgebiet gewährleistet.

Von 2-schneidigen Langlochfräsern über mehrschneidige Schlichtfräser bis zu Hochleistungsfräsern mit Einsatztiefen von  $6 \times d_1$  decken die TOP-Cut-Werkzeuge einen großen Einsatzbereich ab.

Schaftfräser mit einer großen Anzahl an verschiedenen Eckenradien (bis zu 10 pro Durchmesser) runden das Lagerprogramm dieser Produktlinie perfekt ab.

Mit dieser Broschüre zeigen wir eine Auswahl der wichtigsten Hartmetall-TOP-Cut-Schaftfräser. Zu jedem Werkzeug geben wir, in Abhängigkeit zur jeweiligen Werkstoffgruppe, sichere Startbedingungen ( $v_c / f_z$ ) und Hinweise zum empfohlenen Kühlsmierstoff an.

TOP-Cut tools are versatile end mills made from solid carbide which can be used in nearly all materials and milling strategies due to their special geometry properties.

#### Characteristics

- Variable helix angle
- Tapered core diameter
- High-performance coating
- Optionally available with internal coolant supply, axial exit (ICA)

#### Main feature:

Universal use, for all material groups.

The huge number of different versions and dimensions guarantees a very wide range of applications.

TOP-Cut tools cover a huge area of usage from 2-flute slot drills via multi-flute finishing end mills to high-performance end mills with insert depths of  $6 \times d_1$ .

End mills with a large number of different corner radii (up to 10 per diameter) perfectly round off the stock programme of this product line.

In this brochure we present a selection of the most important solid carbide TOP-Cut end mills. We provide reliable starting conditions ( $v_c / f_z$ ) and guidelines concerning the recommended coolant for every tool depending on the respective material group.

**Präzisions-Spannhülsen-Aufnahmen FPC**

Die patentierten Präzisions-Spannhülsen-Aufnahmen FPC sind hochgenaue Werkzeug-Aufnahmen mit mechanischer Klemmung für höchste Spannkraft und Rundlaufgenauigkeit sowie mit sehr guten Dämpfungseigenschaften.

Die Werkzeugspannung erfolgt mittels Spannhülsen.

Das Spannen und Lösen des Werkzeugs geschieht mit einem Sechskantschlüssel, welcher seitlich den Spannmechanismus bedient – und das innerhalb weniger Sekunden. Es können alle Zylinderschäfte nach DIN 6535 oder DIN 1835 gespannt werden.

Die Präzisions-Spannhülsen-Aufnahmen FPC eignen sich hervorragend zum Hochleistungs- und Hochgeschwindigkeitsfräsen. Darüber hinaus können diese auch zum Bohren, Reiben oder zur Gewindeherstellung eingesetzt werden.

**High Precision Collet Holders FPC**

The patented precision collet holders FPC are highly precise tool holders with mechanical clamping which provide superior clamping force and concentricity as well as excellent shock-absorbing properties. The tools are clamped via collets.

Tools are clamped and unclamped with a hexagon wrench which operates the clamping mechanism at the side – and in just a few seconds. All straight shanks according to DIN 6535 or DIN 1835 can be clamped.

The high-precision collet holders FPC are well suited for high-performance and high-speed milling. In addition they can be used for drilling, reaming and threading operations.

- Multifunktionales Hochleistungswerkzeug

- Multifunktionales Hochleistungswerkzeug
- Mit ENORM-Geometrie
- Vibrationsarme Bearbeitung
- Verschiedene Eckenradien pro Schneidendurchmesser
- Schniden zur Mitte oder innere Kühlshmierstoff-Zufuhr, Austritt axial (ICA)

- Multi-functional, high performance tool
- With ENORM geometry
- Low-vibration machining
- Several corner radii per cutting diameter
- Centre cutting or internal coolant supply, axial exit (ICA)

Allround

Allround

## Beschichtung · Coating

## Einsatzgebiete – Material (siehe Seite 4)

- In fast allen Werkstoffen, inklusive zähe Werkstoffe, einsetzbar
- Sehr gut zum Schruppen und Schlichten geeignet

## Applications – material (see page 4)

- For almost all materials, including tough materials
- Very suitable for roughing and finishing

- Multifunktionales Hochleistungswerkzeug
- Neuentwickelte Geometrie
- Vibrationsarme Bearbeitung
- Schneiden zur Mitte
- Schneidenlänge 3 x d<sub>1</sub>
- 3 Baulängen verfügbar

- Multi-functional, high performance tool
- Newly developed geometry
- Low-vibration machining
- Centre cutting
- Flute length 3 x d<sub>1</sub>
- 3 lengths available

Allround

## Beschichtung · Coating

## Einsatzgebiete – Material (siehe Seite 4)

- In fast allen Werkstoffen einsetzbar
- Zum Schruppen und Schlichten geeignet

## Applications – material (see page 4)

- For almost all materials
- Suitable for roughing and finishing

## TIALN

Universalfräser für den Werkzeug- und Formenbau mit ausführlichen Informationen erhalten Sie in unserem anwendungsbezogenen FRANKEN TOP-Cut-Prospekt.

Bestell-Nr. ZP20099.DEGB

Universal end mills for the die and mould industry with detailed information can be found in our application-based FRANKEN TOP-Cut brochure.

Order No. ZP20099.DEGB

**Hartmetall-Schaft- und Langlochfräser – kurze Ausführung (2 - 4 Schneiden)**  
Solid carbide end mills and slot drills – short design (2 - 4 flutes)

**Gültig für · Valid for**

## Hauptkatalog

Main catalogue

Durch die Verwendung von gekühlter Luft wird die Temperatur im Schneidenbereich herabgesetzt, wodurch höhere Schnittgeschwindigkeiten und Standzeiten erreicht werden können. Moderne Beschichtungen können durch diese Art der Kühlung erst alle Vorteile ausspielen, da eine Schädigung der Schneide durch Thermoschock vermieden wird.

Darüber hinaus werden die beim Kopierfräsen anfallenden sehr leichten Späne auch aus tiefen Aussparungen oder Kavitäten mit Hilfe der Kaltluftdüse entfernt.

Die Wirkungsweise der Kaltluftdüse basiert auf dem Prinzip des Wirbelrohrs, in dem zwei gegenläufige, rotierende Luftströme (ohne bewegte Teile) erzeugt werden. An einem Ende tritt die innere Strömung als nutzbare Kaltluft mit bis zu -40 °C aus. Der Anschluss erfolgt über einen Druckluftanschluss.

Cooled air reduces temperatures in the cutting area, which in turn permits higher cutting speeds and longer tool life. This type of cooling enables modern coatings to achieve their full potential, as damage to the cutting edge resulting from thermal shock is avoided.

Moreover, the cold-air nozzle helps to remove the tiny chips produced in copy milling even from deep recesses or cavities.

The function of the cold-air nozzle is based on the principle of the vortex tube, in which two opposed, rotating air streams are generated (without any moving parts). The internal air stream exits from one end, in the form of useable cold air with a temperature as low as -40 °C. All that is required is a normal pressurised air connection.

#### Temperatur gemessen am effektiven Austritt des Wirbelrohrs (nicht Düsenende)

Temperature, measured at the effective exit of the vortex tube (not the end of the nozzle)

Zuluft-Druck Supply air pressure [bar]	Temperatur der Nutzluft in °C bei einem Kaltluftanteil von Temperature of usable air in °C, with a cold air percentage of	25%	50%	75%
3	-31	-22	- 6	
4	-35	-35	- 8	
5	-39	-28	-10	
6	-42	-31	-11	
7	-46	-34	-13	

#### Luftverbrauch bei Eingangstemperatur von 21 °C

Air consumption, with supply air temperature of 21 °C

Eingangsdruck Input pressure [bar]	Luftverbrauch Air consumption	Kapazität Capacity
6,9	7,08 l/s ≤ 25,5 m³/h	226 kcal/h ≤ 263 W

#### Anwendungsbeispiel: Standzeiterhöhung durch den Einsatz der Kaltluftdüse

**Werkstück:** Formeinsatz gehärtet, Material K360 mit 63 HRC

**Bearbeitung:** Schlichten des Formeinsatzes

**Werkzeug:** FRANKEN Hard-Cut

Schneidendurchmesser 10 mm, 2 Schneiden

**Schnittwerte:**  $v_c = 240 \text{ m/min} \cdot n = 7639 \text{ min}^{-1}$   
 $f_z = 0,12 \text{ mm} \cdot v_f = 1833 \text{ mm/min}$   
 $a_p = 0,2 \text{ mm} \cdot a_e = 0,2 \text{ mm}$

Standzeit ohne Kühlung	Standzeit mit Kaltluftdüse
98 Minuten	<b>130 Minuten</b>

Durch den Einsatz der Kaltluftdüse konnte die Standzeit um 33% erhöht werden.

#### Application example: Increased tool life using the cold-air nozzle

**Workpiece:** Hardened mould, material K360 with 63 HRC

**Operation:** Finishing the mould

**Tool:** FRANKEN Hard-Cut

Cutting diameter 10 mm, 2 flutes

**Cutting conditions:**  $v_c = 240 \text{ m/min} \cdot n = 7639 \text{ rpm}$   
 $f_z = 0,12 \text{ mm} \cdot v_f = 1833 \text{ mm/min}$   
 $a_p = 0,2 \text{ mm} \cdot a_e = 0,2 \text{ mm}$

Tool life without coolant	Tool life with cold-air nozzle
98 minutes	<b>130 minutes</b>

By using the cold-air nozzle, it was possible to increase the tool life by 33%.

**Kaltluftdüse**  
 Cold-Air Nozzle

## Lieferumfang:

- Mit biegsamem Schlauch  
(Länge ca. 300 mm) für kalte Nutzluft
- Schalldämpfer (SN14) für heiße Abluft
- Kugelhahn mit Anschlussstück (ST 1/4)  
für Zuluftschlauch (NW6)  
mit Schnellwechselkupplung (NW7.2)

## Delivery includes:

- With flexible hose (length approx. 300 mm) for cold air
- Silencer (SN14) for hot exhaust air
- Ball-valve with fitting (1/4") for inlet hose (6 mm) with quick-change attachment (7.2 mm)
